Prepared by: Stewart Sadler	Date: May 30, 2003	Version: 1.0

General Requirements

Business Objective:

As part of TO 130, the Integration Partner has been tasked with enhancing Form 2000 to provide the ability for the Guarantee Agencies (GAs) to create amended Annual entries within Form 2000. (Requirements Matrix 2.1- 2.9) Currently, the GAs only have the ability to submit the Annual entries once and are not able to resubmit data on this form for the same fiscal year.

Due to the Amended Annual Form 2000 enhancement, there is a need to create a custom Oracle report that will display the fields that have changed when an amended annual form is submitted. (Requirement 2.10) The objective of this Annual Amendment Report is to provide the Financial Partners (FPs) with a report that will highlight the differences between the current amended form and the previous version. This will allow them to review the fields that have been amended without having to compare every field on the two forms.

This report will be accessible to both FP and GA users. Once an amended annual form has been submitted, the FPs will run this Annual Amendment Report by entering the GA Code and Fiscal Year as report parameters. The GA users will only have to enter the Fiscal Year parameter because the GA Code will be defaulted. As additional amendments are made to the annual form, the Annual Amendment Report will always compare the most recent amended report with the last report that was accepted by the FP. For example, if the most recent submission by the GA is the second amendment, the report will compare the second amendment to the first amendment and show the differences between the two.

Component Description:

To fulfill the Business Objective, a custom Oracle report will be created to compare the values from the amended annual form with the values from the previous annual form accepted by the FPs. The report will compare the corresponding values for fields AR-1 through AR-57 from each form and display any fields that have changed.

The header of the new custom Oracle Report will contain the following fields:

- **GA Code**
- **Fiscal Year**
- **GA Name**
- **ED Comments**
- **GA Comments**
- **Amendment Version**
- **Amendment Date**

The report body will contain 2 columns:

- **'Amount/CY Actual' / 'Amendment "x" Amount' column**– This first column will contain the values for AR1-AR57 for the previous form accepted by the FPs. The heading of this column will be conditionally displayed depending on which amendment versions are being compared. If the report is comparing amendment 1 to the original form, the heading will still display 'Amount/CY Actual'. But if the report is comparing amendment 2 to amendment 1, the heading will display 'Amendment 1 Amount.' This process will continue for as many amendments as the user makes.
- **Amended Amount Column** – The second column will display any values that have changed on the amended annual form. The fields in this column will only contain values for the fields that have changed. If the field on the amended annual form has not changed, the corresponding amended amount field will be blank.

In order to allow this report to be submitted by both FP and GA users, the report will be registered twice. This is due to the fact that different parameters are required based on the user submitting the report. If a GA user submits the report, the only parameter required will be Fiscal Year. The GA Code parameter will be defaulted, because the GAs are only

		Subject: FSA GA Annual Amendment Report Functional Design
		TO 130 – Form 2000 Enhancements
Prepared by: Stewart Sadler	Date: May 30, 2003	Version: 1.0

allowed to run this report for their respective GA. If a FP submits the report, both the GA Code and Fiscal Year parameters will be required.

Component Risks:

None

Authorization:

- THE FPS will have the ability to run this report for all GAs.
- The GAs will only have the ability to run this report for their respective GA.

Scheduling Requirements:

This report will be submitted manually by the user as needed from the following menu path:
Others → Requests → Run → FSA GA Annual Amendment report.

Report Characteristics:

Legacy Report Name:	N/A
Distribution:	ED Financial Partners (FP) and Guarantee Agency users
Summary Level:	Detail
Output:	Online
Volume:	One Record per Report
Frequency:	As needed. This report can be run any time after a GA makes an amendment to the annual form.

Development Complexity:

Medium

		Subject: FSA GA Annual Amendment Report Functional Design
		TO 130 – Form 2000 Enhancements
Prepared by: Stewart Sadler	Date: May 30, 2003	Version: 1.0

Assumptions:

1. The GA users will not be able to change any of the projection columns on the amended report.
2. The GAs will have the ability to submit an amended Annual Form 2000 only after the original Annual Form 2000 has been accepted by the FPs in FMS for a fiscal year.
3. GAs are able to view and submit records only for their own GA code.
4. Two new columns will be added to the Annual Form 2000 table. One column will hold the amendment version number and the other will hold the most updated record flag.
5. Amended Annual Form 2000 for a prior fiscal year may be submitted an unlimited number of times for each GA code until the Annual Form 2000 for the next fiscal year is received. However, the amended report can only be submitted for reports that have a status of 'accepted.'
6. The Amendment Date field will be displayed in the header of the form. The Amendment Date will be the creation date of the amendment.
7. The GAs will only have the ability to modify the most updated record as an amendment that will then be saved as a new record.
8. Amendments submitted for records that have a status of "Accepted" will be created as a new record in the database.
9. When saving changes made to records that are amendments with a status of "Rejected" or "In Process", the record will be updated, not inserted, in the database.
10. All initial entries of a record will be assigned an amendment version number of 0.
11. All records that currently exist in the database will have a null amendment version number.
12. Each itemized line item for items AR-20, AR-25, AR-36, and AR-39 will be linked to each GA Code/ Fiscal year, including amendments, by the AR id in the database tables. Therefore, no columns need to be added to the FFELGA_ANNUAL_ITEMS table. This also means that for each record created in the Annual Form 2000, there will be a record created for each itemized line item related to that Annual Form 2000 record.
13. The GA code is properly linked to the supplier through the user name of the GA running the report.
14. If the GA runs the report and no amendments exist, no data will be found. (Even though the original exists.)

Other Dependencies/Special Concerns:

N/A

Error Handling

[REQUIRED]

Potential Errors	Possible Reasons	Solution Strategy
No data found when GA runs report	No data exists for specified GA Code and Year since no amendments have been made to the specified form	Verify that an amendment has been submitted for the Fiscal Year entered
No data found when FP runs report	No data exists for specified GA Code and Year since no amendments have been made to the specified form	Verify that an amendment has been submitted for the GA Code and Fiscal Year entered

Testing Requirements

[REQUIRED. List at a high level any requirements that exist to fully test this component.]

Requirement #	Test Condition	Expected Results
2.10	Make a change to fields AR-1 through AR-57 in the 'Amount/ CY Actual' column on the annual form and submit an amendment. Run the Amended Annual Report.	The report will run and display the amended amount in the Amended Amount column of the report. The amendment version number and amendment date will also display in the header.
2.10	Log into Oracle as a GA User. Run the Amended Annual Report.	The parameter screen will appear. The Fiscal Year field will be available for entry.
2.10	Log into Oracle as an FP User. Run the Amended Annual Report.	The parameter screen will appear. Both the GA Code and the Year fields will be available for entry.
2.10	Create a second amendment to a financial form and run the Amended Annual Report	The report compares the second amendment to the first amendment. The report heading for

		Subject: FSA GA Annual Amendment Report Functional Design
		TO 130 – Form 2000 Enhancements
Prepared by: Stewart Sadler	Date: May 30, 2003	Version: 1.0

		the Amount/ CY Actual column changes to Amendment 1 Amount and the Amendment 1 values are displayed in fields AR1-AR57.
2.10	Log into Oracle as a FP or GA user and run the Amended Annual Report for a form that has not had an amendment made.	The following message will be displayed, 'There is no data found.'

Issues and Additional Considerations

The following Issues were defined during Functional Design:

Issue	Raised By / Date Needed	Resolution/Answer	Resolved By / Date Completed
